

APOLLO DESIGN 06

DUPLEX

Specifically designed to fit together on a single block, Apollo Design 6 has been created to open up living and investment potential with separate driveways and separate street frontage for each home without the hassle of a Body Corporate.

With three spacious bedrooms located on one side and the living area towards the rear, this is a clever design inspired by its superb use of space.

All external walls and dividing fire walls are block work which is an ideal fire rated building material as well as being termite proof, cyclone resistant and excellent insulator.
